PROFESSIONAL SUMMARY

AI/ML Engineer with hands-on experience in building Deep Learning, Computer Vision and LLM-powered applications. Skilled in Python, Scikit-learn, TensorFlow, and end-to-end deployment using Docker, Streamlit and Render. Focused on building scalable, reliable systems with efficient performance.

EDUCATION

GITAM University - Hyderabad, Telangana 2022 - 2026
Bachelor of Technology in Computer Science and Engineering (AI/ML) CGPA -7.68

Excellencia Junior College - Hyderabad, Telangana 2020 - 2022
Intermediate in Maths Physics Chemistry Percentage - 89%

EXPERIENCE

AI/ML Intern | EvoAstra Ventures Pvt Ltd. Oct 2025 - Nov 2025

- Developed an Image Caption Generator, training a base VGG16 and a custom hybrid CNN-LSTM architecture with 8031 images, achieving BLEU scores between 0.3-0.5
- Implemented an automation-driven web scraper to extract details of 20+ Maruti Suzuki cars from AckoDrive Website using Selenium and BeautifulSoup, achieving data completeness and accuracy rates up to 95%
- Led a 10-member Agile team to develop and deliver production-grade solutions for real-world use cases

TECHNICAL SKILLS

Programming Languages: Python, SQL
AI & Machine Learning: Pandas, Numpy, Scikit-learn, Tensorflow, LangChain, CrewAI, RAG, Ollama
Databases: MySQL, MongoDB, ChromaDB
Deployment: Streamlit, FastAPI, Docker, Render
Version Control: Git, GitHub
Additional Skills: Technical Leadership, Analytical Thinking

PROJECTS

Personal AI Data Analyst | Python, Pandas, Ollama, MySQL, Streamlit, Docker, Render

- Built automated data analysis pipelines to perform EDA, Pre-processing, Transformation, Recommendations on structured datasets, reducing manual analysis effort by 70%
- Integrated Llama3.2:1b and Gemma3:4b for natural language understanding, reducing response latency to under 1 second

Brain Tumor Classification and BrainyBot | Python, Tensorflow, SerpAPI, MongoDB, Streamlit, Docker

- Custom-trained a base ResNet50 model with 7200 MRI images to classify brain tumors with 91% accuracy and detection latency of 650ms per image.
- Integrated a real-time chatbot using Geoapify to locate nearest hospitals within 1.5-2 seconds

Auto-Responder for Phishing Attacks | Python, Scikit-learn, Ollama, MongoDB, Streamlit, Docker, Render

- Trained different supervised ML models on 20000+ Emails/Messages/URLs, achieving accuracies between 93-96%
- Generates automated responses within 2-3 seconds, preventing manual intervention during phishing attacks

ACHIEVEMENTS

- Worked as a Team Lead with a 26-member team in G-Electra Club from Oct 2024 to Sep 2025.
- Secured 2nd runner up in the internal Smart India Hackathon 2024.

CERTIFICATIONS

· IBM – Deep Learning with Keras · IBM – ML with Python (Honors) · Cisco – Python Essentials
